## 8.2. Exposure controls:

Technical control measures:

General or local mechanical ventilation of working area is sufficient.

### Individual protection measures:

**a) respiratory protection** – not necessary under normal conditions with sufficient ventilation, required during exposure to high concentrations of vapours. When needed use half mask with SA type filter.

**b) Hand protection** – use protective gloves. Wear protective gloves made of: butyl rubber, neoprene, nitrile rubber, polyvinylchloride, thickness min. 0,4 – 0,7mm. The Breakthrough Time > 480 min. Material of gloves must be resistant to the product. As the product is a mixture of several substances, the resistance of material of gloves cannot be calculated in advance and therefore has to be checked before use. From the manufacturer's advice should be obtained information about the time of the penetration of substances and such time must be respected. The Breakthrough Time indicated by the manufacturer must exceed the period during which the product is being used. It is recommended to change gloves and replace them immediately if you notice any signs of wear, damage (rupture, perforation) or changes in appearance (color, flexibility, shape).

**c) Eye protection** – recommended protective glasses

**d) Skin protection** – protective clothing
